

Komprise Intelligent Data Management

Know First. Move Smart. Take Control.

Komprise is the industry's only multi-cloud data management-as-a-service that frees you to analyze, mobilize, and access the right file and object data across clouds without shackling your data to any vendor. Komprise helps you cut 70% of storage costs by right-sizing and right-placing data, while making it easy for users to unlock data value.

One Data Management Platform for All Your NAS and Cloud Data

With Komprise Intelligent Data Management, powered by Transparent Move Technology™ (TMT), you'll always have the right data, in the right place, at the right time—without vendor lock-in.

70% reduction in storage costs.

27x faster data migrations.

100% native access to cloud data.

Komprise Use Cases:

- **Data Analytics:** Insight-driven planning.
- **Cloud Tiering:** Right-place data with access at every tier.
- **Data Migration:** 27x faster than point tools.
- **Data Replication:** Cloud DR at half the cost.
- **Feed Data Pipes Index:** Unlock data value.

Don't Compromise. Komprise.

With Komprise, you can analyze, migrate, tier, replicate, and extract file and object data *anywhere*.

Know First

See across your data silos, vendors, and clouds to make informed storage and backup decisions.

- Analyze any NAS, S3
- Plan, project cost savings
- Search, tag, build a global file index with Deep Analytics

Move Smart

Establish analytics-driven policies to manage data based on its need, usage, and value.

- Transparently tier cold data without disruption with TMT
- Migrate data 27 times faster
- Replicate to the cloud for 50% less

Take Control

Build a foundation and unlock the potential of your data.

- Ensure data mobility and avoid storage vendor lock-in
- Open, standards-based platform
- Native cloud access to tiered data

Why Komprise?

Komprise puts you in control of your unstructured data—not your storage, cloud, or backup vendor—so you can easily right-place data for both cost and performance.

Key Benefits

- ✓ No hardware to deploy
- ✓ No storage agents
- ✓ Fully preserves file attributes
- ✓ No degradation of hot data
- ✓ No scaling limits
- ✓ No silos or vendor lock-in
- ✓ No complex configurations
- ✓ No disruption; runs seamlessly in the background
- ✓ No changes to users or application access
